DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The case is allowed based upon the BPAI reversal of the examiner's rejection.

As noted in the panel decision, the limitation of "... determin[ing] which of the predetermined number of channels contain programming to provide the subset of channels with programming . . . " has been interpreted by the panel as requiring for the determination of the presence or absence of 'programming'. The application notes that satellite providers (similar to those utilized by Elenbaas) typically provide channels that are absent programming (IA: Page 2, Lines 7-16). This would appear to support the conclusion that Elenbaas would necessarily distinguish between channels with or absent programming in order to only provide those channels with actual programming (ex. hockey) that is of interest as opposed to those channels that do not have programming. However, the panel concluded that since Elenbaas begins with all channels that contain programming it subsequently provides no clear teaching or suggestion of determining the presence or absence of programming since there is no actual absence of programming within the subset of channels being analyzed by Elenbaas. Therefore, the case is allowable since the panel concludes that a prima facie case of obviousness was not established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
